

EXPERIMENT – 4A

Name : GAYATHIRI T

Roll no : 240701140

Conduct task analysis for an app (e.g., online shopping) and document user flows. Create corresponding wireframes using Lucidchart

Aim :

To understand and document the steps a user takes to complete the main tasks within an online shopping app.

Step 1: Assigned Tasks

1. Browsing Products
2. Searching for a Product
3. Adding to Cart
4. Checkout Process

Step 2: Document User Flows (Based on Wireframe)

1. Browsing Products

1. Start
2. Open App
3. Home Screen
4. Browse Option Selected
5. Browse Categories
6. Product List Displayed
7. Select Product
8. View Product Details

Flow:

**Start → Open App → Home Screen → Browse → Categories → Product List
→ Product Details**

2. Searching for a Specific Product

1. Start
2. Open App
3. Home Screen
4. Search Option Selected
5. Enter Keyword
6. View Search Results
7. Select Product
8. View Product Details

Flow:

**Start → Open App → Home Screen → Search → Enter Keyword → Search
Results → Product Details**

3. Adding a Product to the Cart

1. View Product Details
2. Click “Add to Cart”
3. Product Added to Cart
4. Option to Review Cart

Flow:

Product Details → Add to Cart → Review Cart

4. Checking Out

1. Review Cart
2. Click Checkout
3. Enter Shipping Information
4. Enter Payment Information
5. Place Order

6. Order Confirmed

Flow:

Review Cart → Checkout → Shipping Info → Payment Info → Place Order → Order Confirmed

Combined User Flow (From Wireframe)

Start → Open App → Home Screen →

(Browse OR Search) →

Product Details → Add to Cart → Review Cart →

Checkout → Enter Shipping Info → Enter Payment Info →

Place Order → Order Confirmed

Conclusion

The wireframe clearly shows a structured user journey where the user can either browse or search for products, view product details, add items to the cart, and complete the purchase through a checkout process ending with order confirmation.
