

Experiment-1

Name : Gayathiri T

Roll no : 240701140

GOOD DESIGN (Left Screen)

1. Layout & Structure

- * Well-organized and balanced layout
- * Proper spacing between icons and elements
- * Important actions are grouped logically

2. Color Usage

- * Uses a single consistent background color
- * Good contrast between text, icons, and background
- * Easy on the eyes and visually pleasing

3. Readability

- * Caller name and call duration are clearly visible
- * Text size is readable and well-positioned
- * Icons are labeled, reducing confusion

4. Usability

- * Frequently used call controls (mute, hold, video call) are easily accessible
- * Icons are familiar and easy to understand
- * Improves user experience during a call

5. User Experience

- * Looks professional and intuitive
- * Reduces user effort and mistakes
- * Suitable for long usage

BAD DESIGN (Right Screen)

1. Layout & Structure

- * Poor alignment of elements
- * Too much empty space in the screen
- * Icons are scattered without proper grouping

2. Color Usage

- * Very bright background color
- * Low contrast between text and background

- * Causes visual strain to users

3. Readability

- * Caller name is small and unclear
- * Time and important information are not prominent
- * No proper hierarchy of elements

4. Usability

- * Icons lack labels, making them confusing
- * Important actions are not clearly highlighted
- * Users may struggle to find required options

5. User Experience

- * Feels cluttered and unbalanced
- * Less intuitive and harder to use
- * Poor interaction design

Key Differences

- * Good design is clear, organized, and user-friendly
- * Bad design is confusing, visually harsh, and inefficient
- * Good design improves usability; bad design increases user effort
